Professor, Department of Physiology, Maulana Azad Medical College, New Delhi, India.

*Dear all,*

It gives me immense pleasure to introduce the.... issue of International Physiology. In this issue we have incorporated the original research papers and review articles from the renowned faculty. The review article on Guillain-Barré Syndrome is of great clinical and academic significance. The article on diabetes and ozempic is thought provoking, and of great significance in today's world. We have sincerely tried to include topics from various fields of physiology with emphasis on applied aspects. Chrononutrition and cancer is an interesting and intriguing topic in today's era. To enlighten further many interesting original research articles on cardiovascular reactivity, autonomic balance and pranayama have been incorporated. I am very sure that you will find this issue captivating and purposeful. I am optimistic that you would certainly recommend the journal to your peers. We are looking forward to your submissions and support.
